- Weight: 1520g (3.35 lb.) (pair)
- Volume capacity: 55.3 L (pair)

- 1 Hang the bag onto your rack and adjust the screw so that the hook fits the diameter of the rail.

- 2 Turn the center lock to secure the bag.

- 3 Make sure your pannier is firmly attached before each ride by giving the handle a wiggle.

- 4 Adjust the lower rack hook

- Loosen the screw on the hook before placing your pannier on your rack
- Slide the hook to adjust its position along the vertical rack rails making sure there is enough space between the bag and pedals

- 5 Secure the lower rack hook

- Remove the pannier by swinging it, without moving the hook
- IMPORTANT: Tighten the screw back into place
- Place the pannier back on the rack and secure the top clips.
- The hook will then be in the proper place to hold tight to the vertical rack rails, preventing the pannier from swinging away from the rack.

! **WARNING** Remove the pannier before transporting your bike on a car.

WARRANTY & CUSTOMER SERVICE

Our entire product line is made from reclaimed and recycled materials. We ensure our products are ethically produced by trusted partners who are like family. Quality products with a lifetime warranty because product made to last means less waste.
